Summary:

Visual specialist turned web developer with a passion for design. I am driven to learn about the users and how best to communicate with them through personal interactions. I am quick to discover unconventional solutions yet always open to sharing my analytical and creative approach.

Professional Web Development Experience:

Yombu

Software Engineer Oct 2017 – Pres

- Provided UX research to provide software pain points for both users and merchants
- Help update website content

Secure Identity Ledger Corporation

Web Developer Intern Jun 2017 – Sep 2017

- Developed D3.JS Codes for data visualization for Salesforce Data Analysis
- Gained Block Chain understanding using NodeJS and implementing front end animations

Student Opportunity Center

Web Developer Intern May 2017 – Sep 2017

- Created Front-end material using Angular 2 and Typescript.
- Implemented new functionalities through research and communicated work done via weekly 1-on-1 with the Lead Engineer
- Raised awareness on non-functional codes in order to fix it prior to releasing new features via GitHub Issues

Software Information Resource Corp

Technical Recruiter Nov 2016 – Dec 2016

- Hired multiple TS/SCI-cleared IT professionals in the first two months using both traditional and modern recruiting tactics.
- Created Company's sister website using WIX, a website templating platform.

Other Job Experience:

Banana Republic

Visual Specialist Jun 2013 - Present

- Created visual displays that were incorporated as instructions for other stores nationwide
- Supervised new hire training from visual duties, support functions to individual customer experience
- Orchestrated visual updates by directing a team on execution.

Skills

- **Front End:** JavaScript, AngularJS, Angular 4, Bootstrap, React, JQuery, D3.JS
- **Back End:** NodeJS, ExpressJS, PostgreSQL, MongoDB, Ruby on Rails
- **Other:** HTML/CSS, Wireframing, Sketch, Prototyping, InvisionApp, Digital Marketing, UX research

Projects

My Reads

Sep 2017

https://github.com/david-chua/My_Reads_App

A book organization app that sorts books into three categories using Udacity's Book API and React.JS

Training For Gains

Mar 2017

<https://gains-for-days.herokuapp.com/>

A workout log created using Ruby on Rails and PostgreSQL in the backend and Angular 1 for the front end in order to remove the need for notebooks in the gym.

Unitour

Oct 2017

<https://invis.io/PMDUDUOJR>

Final project for UX design course which is a prototype for a virtual reality application. It is created using Sketch and InvisionApp as well as doing interviews and various questionnaires.
